

## What Can We Do For You?

### Desktop Services as a Managed Services Provider

Did you know Desktop Services Group Inc. is now offering Managed Services to all of our clients? We've partnered with ZenithRMM, a well-known and widely used provider of Managed Services, in order to provide our customers with the highest level of service at an affordable rate. But just what are Managed Services?

### Desktop Services Announcement!

Desktop Services recently completed the move of its **entire** back-end office computing environment to VMware. VMware is the undisputed leader in desktop and server-based virtualization technology (also known as cloud computing). Just a few of the benefits of virtualization include:

- Reduced reliance on power and cooling for your computing environment
- Better use of CPU and disk resources, as multiple hosts can run on one physical computer chassis.
- More backup and disaster recovery options

Click the link below to learn more about why your business should be leveraging this fast-growing technology
